DETAILED ACTION

1. Claims 1-21 were examined.

Section I: Non-Final Rejection (3rd Office Action) Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 4. Claims 1-21 are rejected under 35 U.S.C. 102(a) as being anticipated by Pai et al., "ACME, aTelerobotic Active Measurement Facility" (1999); (hereafter Pai). Pai teaches developing a robotic measurement facility (abstract).
- 5. **Per claims 1,11, 21:** mechanism designing section for three-dimensionally designing a mechanism comprising an actuator and a sensor (pg. 4, section 3.1); for simulation (pg. 6); an embedded software developing section for developing a control program (pg. 1, abstract, 3rd paragraph); imputing designing data (controlled via the Internet, thus source of data: pg.1, abstract, 3rd paragraph); transferring actuator instruction data and sensor data between 3-d mechanism model (pg. 5-6, section 3.1).
- 6. **Per claim 2,12:** inputs result of the simulation to be reflected on the designing of the mechanism (pg. 1, abstract, 1st paragraph).

Application/Control Number: 09/754,301 Page 3

Art Unit: 2123

7. **Per claim 3,13:** creating embedded software status-transitions or table of specifications (pg. 6, figure; part of Java).

- 8. **Per claims 4,5,714,15,17,21:** ability to stop plural task (ability to control tasks: pg. 4, section 3).
- 9 **Per claim 6,16,21:** embedded software includes a microcomputer chip in which said embedded software is embedded (ACME Server: pg. 4, section 3); synchronizing tasks (pg. 5, 2nd paragraph).
- 10. **Per claim 8,18:** simulation section (pg. 1, abstract, 1st paragraph); prioritizing task (*MPEP 2144.04, Section IV, C. Rearrangement of Parts*).
- 11. **Per claim 9,19:** actuator instruction signal for 3D model from embedded software and sensor signal, which is obtained as the result of simulation response (pg. 4-5, section 3.10).
- 10. **Per claim 10,20:** analyzing and displaying (pg. 5) variation of actuator instruction and sensor signal from 3D simulation in real-time (pg. 9. 3rd paragraph).

Section II: Response to Applicants' Arguments (2nd Office Action) Specification

12. The Office acknowledges and accepts amendment.

102/103

13. The applicants are thanked for addressing theses issues. Rejections are withdraw; however, an updated search was conducted based on the amended claims.

Correspondence Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mr. Tom Stevens whose telephone number is 571-272-3715, Monday-Friday (8:00 am- 4:30 pm) or contact Supervisor Mr. Leo Picard at (571) 272-3749. Central Fax number is 571-273-8300.

Any inquiry of a general nature or relating to the status of this application should be directed to the TC 2100 Group receptionist: 571-272-2100.
